Summary

Seeking a challenging role as a software developer where I can leverage my expertise in full-stack development, machine learning, and database management to create innovative solutions. Passionate about problem-solving and eager to contribute to cutting-edge projects while continuously expanding my technical skills.

Education Background

Bachelor of Technology (B.Tech.) in Computer Science and Engineering **2022 - 2026**
College of Engineering Roorkee (COER), Uttarakhand *CGPA: 9.37/10 (Present)*

Senior Secondary Education (Class 12th) **2022**
St. Mary's Senior Secondary School, Uttarakhand *Percentage: 86.8%*

Secondary Education (Class 10th) **2020**
St. Mary's Senior Secondary School, Uttarakhand *Percentage: 77.8%*

PROJECTS

Personalized Diet Recommendation System | Tailwind CSS, Python **Feb 2025**

- Developed an interactive, user-friendly frontend using HTML, CSS, Bootstrap, and Tailwind CSS, optimizing the design for mobile and desktop platforms, improving user engagement by 40%.
- Engineered the AI-driven backend system, utilizing Python, to analyze user health data, dietary habits, and fitness goals, providing personalized meal recommendations and real-time nutrient tracking, improving user health insights.
- Implemented a database-driven system that securely stores and retrieves user data, supporting over 500 concurrent users with an average response time of under 2 seconds.
- Collaborated with a cross-functional team of 4 members, delivering the project ahead of the 1-month deadline, with over 80% of users reporting satisfaction in post-project surveys.

Bank Management System | Java, MySQL **Jan 2025**

- Designed and developed a fully functional Bank Management System desktop application using Java (AWT & Swing) and MySQL to simulate core banking functionalities.
- Implemented a secure user authentication system with card number & PIN verification, and integrated features for deposits, withdrawals, balance inquiries, and transaction history, enhancing security and usability.
- Optimized database queries to improve transaction processing speed by 30%, ensuring efficient real-time updates and minimal latency in operations.
- Handled the integration of transaction history tracking, ensuring accurate record-keeping with 100% data consistency across different sessions.
- Collaborated with a team of 3 developers, ensuring project completion within a 2-month timeline, and implemented responsive design to support future mobile app integration.

Experience

YBI Foundation **June 2024 - July 2024**
Data Science and Machine Learning Intern

- Successfully completed a 1-month internship focused on the fundamentals of Data Science and Machine Learning.
- Worked on real-world classification and regression problems, applying machine learning algorithms to large datasets.
- Collaborated with the team on GitHub-hosted projects, enhancing problem-solving skills through code reviews and model implementations.

Technical Skills

- Languages: Java, C, Python
- Frontend: HTML, CSS, Bootstrap, Tailwind CSS, Javascript, NodeJs, ExpressJs, React
- Databases: MySQL, MongoDB
- Tools: VS Code, Git and GitHub, IntelliJ IDEA, PyCharm

EXTRA-CURRICULAR ACTIVITIES

- Participated in National Hackathon 4.0 and Internal Hackathon at Coer University
- National social Summit at IITR
